

Capability Statement

BUSINESS SUMMARY

Jayco mmi Inc. is a WOSB that designs, engineers and manufactures custom Human-Machine Interfaces (HMI), control panels, switch bezels, and assemblies, for critical and high reliability applications in defense and aerospace.

CORE COMPETENCIES

Design products suitable for aerospace and defense requirements

- Create concepts from scratch, and develop virtual prototypes
- Complex applications, in limited space, or solve unusual problems

Engineer parts to meet MIL-SPEC standards

- Harsh and rugged environments
- Integrate switches, displays, touch panels, electronics, enclosures, etc. to simplify assembly and increase reliability
- Reduce SWaP, and cost

Manufacturing to AS9100 standards

- Prototypes
- Volume manufacturing

DIFFERENTIATORS

- Over 3 decades of experience in HMI applications for defense, aerospace, and other critical applications
- Jayco has developed over 2000 different HMIs for land, sea, and air
- We listen to your needs and apply intelligent design to create products that work
- We combine military and commercial technologies for innovative, cost effective solutions, and rapid deployment
- We can meet MIL-STD-461, MIL-STD-810, MIL-STD-3009 and other performance standards

PAST PERFORMANCE

Rockwell Collins – 29 years – Aircraft cabin controls

Northrop Grumman – 24 years – IAMD and access control

United Technologies – 11 years - EFB and aircraft controls

General Dynamics – 8 years - Submarine communications

L3 Communications – 10 years - Cockpit displays and rugged computers

Raytheon – 11 years - Mobile communications

Lockheed Martin – 10 years - Maritime controls

Viasat – 9 years - Communications

Securecom – 12 years - Military communications
